

Keeps users' Internet activity private and secure, wherever they are.

BullGuard VPN is the simple, one-click solution that ensures personal data can't be intercepted and keeps users' Internet activity totally private. With over 2000 BullGuard VPN servers in 16 countries, users can shield their identity and enjoy parts of the online world they would otherwise not be able to access.

With public anxiety about cybercrime and suspicions around privacy infringement by Governments, ISPs, Social Media companies and various 'research' organizations, it isn't surprising that in the battle for privacy and security VPN has become the hot ticket item in online protection.

BullGuard VPN provides some great benefits:

- Military-grade encryption keeps data safe from hackers, snoopers and criminals
- Securely share files and access data from cloud storage
- Access applications and websites in complete anonymity
- Even access blocked websites or bypass Internet filters

Why your customers need BullGuard VPN

Total freedom online

BullGuard VPN is the simple and reliable way to total Internet freedom and online privacy. BullGuard VPN gives users the flexibility to safely and securely access the Internet and online services from wherever they are.

Privacy assured

At home on the computer or on their phone on a public Wi-Fi, BullGuard VPN keeps users and their information safe.

Go private instantly

Simply click on Quick Connect for one click access to the nearest BullGuard VPN server. Or choose to route through any of our 16 countries around the world to shield one's identity and gain new access to the Internet.

No logging or tracking policy

BullGuard VPN does not log what users do online, nor keep records of the websites they visit, ensuring they have complete online privacy.

Any device, any operating system

Secure up to six devices simultaneously with a single account – desktop computer, smartphone, laptop or tablet – across all major operating systems: Windows, macOS, Android and iOS.

Bulletproof security with Kill Switch feature

Kill Switch secures private data from accidental exposure preventing a user's IP address and other sensitive data being broadcast if their connection accidentally drops.

Easy to setup, easy to use

Benefit from a simple yet powerful VPN app that works smoothly with your device, connecting automatically when your system starts up.

No bandwidth limits

There are no speed limits at our end. Enjoy your full-speed VPN connection without any throttling.

BullGuard VPN v. the competition

| Features | | Avast SecureLine VPN | Avira Phantom VPN Pro | BullGuard VPN | CyberGhost | F-Secure FREEDOME | HMA | Hotspot Shield Premium | NordVPN | Norton Secure VPN |
