

This product requires the MiHome Gateway to function

MiHome Energy Monitor

The MiHome Energy Monitor is a monitor only product. The Energy Monitor allows you to monitor the amount of electricity being used by the appliance plugged in to the socket. Using the MiHome App you are able to group these and then explore how much energy is being used by different sets of adapters. The App also shows this data over time and as a cost by using your electricity tariff.

Technical information:

- Product code: MIH0004
- Maximum load: 3000W
- Maximum current: 13A
- Voltage range: 230-250V 50Hz ac
- Plug and socket: BS 5733 and the relevant clauses of BS 1363
- Transmission Frequency: 434.300 MHz
- Protocol: OpenThings (I6663DOC14)
- Plug adapter housing in UK format to BS1363
- Location: Indoor use only
