

This product requires the MiHome Gateway to function

MiHome Adapter Plus

The MiHome Adapter Plus combines the functions of the monitor and the control products. The adapter allows you to monitor the amount of electricity being used by the appliance plugged in to the socket. Using the MiHome App you are able to group these and then explore how much energy is being used by different sets of adapters. The App also shows this data over time and as a cost by using your electricity tariff.

The MiHome Adapter Plus also allows you to use all the control features in the MiHome App including simple on/off, timers and geofencing.

The MiHome Adapter Plus is a transmitter and transceiver and therefore will let the user know when an action has been carried out.

Technical information:

- Product code: MIHO005
- Maximum load: 3000W
- Maximum current: 13A
- Voltage range: 230-250V 50Hz ac
- Plug and socket: BS 5733 and the relevant clauses of BS 1363
- Transmission Frequency: 434.300 MHz
- Protocol: OpenThings (16663DOC14)
- Plug adapter housing in UK format to BS1363
- Location: Indoor use only
