

The piXL range has been designed around one thing  
**The very best quality and features at affordable prices.**

## Premium displays without premium pricetags

Every piXL monitor is designed to offer long-term, reliable and enjoyable use with a range of ergonomic and technical features to suit all requirements in the home, esports, business, education, enterprise or a more specific use such as CCTV and security monitoring.

With in-demand technical features like USB-C, low blue-light technology, curved screens, 4K resolution, 16 million colour support, Nvidia G-Sync and AMD FreeSync support, sRGB compatibility and HDR, piXL covers the vast majority of display requirements.

We also offer ergonomic features like height-adjustable and tilting stands, frameless displays and speakers to make your computing experience immersive, responsive and safe, even through extended use.

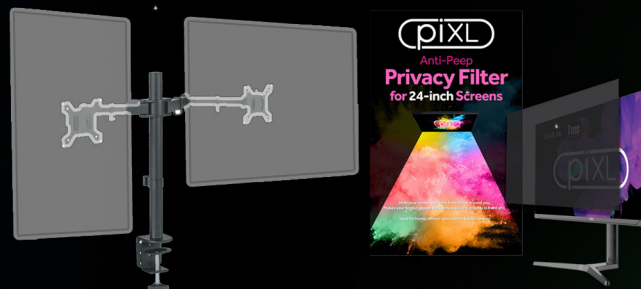

## Monitors & accessories for all users & requirements

Every piXL monitor is designed to be as adaptable and useful in as many situations as possible, with features like HDMI, DisplayPort and USB-C connections, VESA monitor mounts, Kensington Locks and frameless designs, ideal for home and business users alike, across the range.

For the gamers, content creators and video editors, there's fast response times, high refresh rates and curved ultrawide panels, whilst schools and educational establishments benefit from internal power supplies, stereo speakers and smaller screen sizes to fit seamlessly into classrooms.

And then there are ultra high-definition 4K monitors for the whole family to enjoy whether it's for homework, catching up with friends or streaming films in smooth, glorious colours.

We also offer a range of accessories to complete your setup - free up desk space with piXL monitor arms and protect yourself from prying eyes with our privacy filters.
